CONTENTS OF VOLUME 82

NUMBER 1—MAY 1994

Editorial
By B. J. HOWARD 1

On the transferability of energy adjusted pseudopotentials: a calibration study for XH_4 (X = C, Si, Ge, Sn, Pb)
By U. STEINBRENNER, A. BERGNER, M. DOLG and H. STOLL 3

Computational and experimental study of NMR relaxation of quadrupolar noble gas nuclei in organic solvents
By J. VARRA, J. JOKISAARI, T .T. RANTALA and J. LOUNILA 13

Accurate *ab initio* carbon–proton and proton–proton spin–spin coupling surfaces for the methane molecule
By J. GEERTSEN, J. ODDERSHEDE, W. T. RAYNES and T. L. MARVIN. 29

Dynamical and thermodynamical properties of the acetylacentones of copper, aluminum, indium, and rhodium
By R. V. BELOSLUDOV, I. K. IGUMENOV, V. R. BELOSLUDOV and V. P. SHPAKOV 51

Phase transition of water at constant excess chemical potential An application of grand molecular dynamics
By JIE JI and B. M PETTITT 67

Correlation diagrams for Hund's coupling cases in diatomatic molecules with high rotational angular momentum
By E. E. NIKITIN and R. R. ZARE 85

Molecular dynamics simulation of binary mixtures of molten alkali carbonates
By J. T. W. M. TISSEN andG. J. M. JANSSEN and J. P. VAN DER EERDEN 101

Computer simulation studies of anisotropic systems XXIII. The gay–Berne discogen
By A. P. J. EMERSON, G.R. LUCKHURST and S. G. WHATLING 113

Molecular structure of thin surfactant films at the liquid–vapour interface
By T. A. CHEREPANOVAand A. V. STEKOLNIKOV 125

The structure, energetics, and harmonic vibrations of B_3N and BN_3
By J. M. L. MARTIN, Z. SLANINA, J.-P. FRANÇOIS and R. GIJBELS 155

Formation of the XeCl exciplex via double crossings of potential-energy curves
By W. Y. LEE, Z. M. XIA and E. A. BALLIK 165

Computer simulation of the behaviour of a solute in a model liquid crystalline solvent
By W. E. PALKE, J. W. EMSLEY and D. J. TILDESLEY 177

Accurate prediction of static dipole polarizabilities with the moderately sized basis sets Molecules containing p-block atoms from boron to iodine
By J. DOUGHERTY and M. A. SPACKMAN 193

A model for multipole polarizabilities and dispersion coefficients
By P. W. FOWLER, H. M. KELLY and N VAIDEHI 211

Research Note

Refractive index in a dilute solution of molecules with intramolecular coupling up to a third order in the external field
By E. SQUITIERI, M. GARCIA-SUCRE, J. L. PAZ and V. MUJICA 227

NUMBER 2—10 JUNE 1994

Measurement and interpretation of the second light-scattering virial coefficients of linear and quasi-linear molecules
By V. W. Couling and C. Graham 235

Comparison of electron density functional models
By G. G. Hoffman and L. R. Pratt 245

Macro state Markov chain model for computer simulation of grand canonical ensemble
By Ai Chen and C. S. Hirtzel 263

Isosteric and isothermal studies of the Raman depolarization ratios in an argon–methane mixture at 298 K and 323 K
By M. Wright, T. Murphy and F. G. Baglin 277

The millimetre-wave spectrum of trimethylene sulphide. Vibration–rotation coupling between the $v = 2$ and $v = 3$ ring-puckering excited states
By J. C. López, A. G. Lesarri, J. L. Alonso, R. Spiehl and A. Guarnieri 283

Proton and carbon-13 NMR study of partially oriented 1,4-dioxane. Determination of the r_z structure and of bond contributions to the orientation
By A. L. Esteban and M. P. Galache 303

NMR relaxation in ethanol and propanol and in their binary mixtures with carbon tetrachloride
By R. Ludwig and M. D. Zeidler 313

The photochemistry of propanone and its derivatives as studied using flash-photolysis ESR; electron spin polarization (CIDEP) in radical products
By S. N. Batchelor, C. W. M. Kay, K. A. McLauchlan, P. D. Smith and M. T. Yeung 325

Decomposition of the interaction correlation energy in terms of localized orbital contributions
By C. Kozmutza, E. Kapuy and E. Tfirst 343

Localized rotational perturbation between $5p\pi D''(v = 2)$ and $7p\pi(v = 1)$ states of H_2
By S. Takezawa 351

Excited states of the CN^+ ion: an *ab initio* study
By D. M. Hirst 359

On the magnetic shielding anisotropy at the lithium sites of zeolite Li_4Na_8A
By B. Schimiczek, R. Greth and B. Boddenberg 369

Deviation from corresponding-states behaviour for polar fluids
By M. E. van Leeuwen 383

Generalized coordinate hybrid Monte Carlo
By B. M. Forrest and U. W. Suter 393

Formulae for the first and second derivatives of anisotropic potentials with respect to geometrical parameters
By P. L. A. Popelier and A. J. Stone 411

NUMBER 3—20 JUNE 1994

A new precise determination of the liquid bromine structure by means of neutron diffraction
By A. Filabozzi, U. Buontempo, R. Delaplane and F. P. Ricci 427

A new algorithm for molecular dynamics simulations in the grand canonical ensemble
By L. F. Vega, K. S. Shing and L. F. Rull 439

Free energy calculations for Lennard-Jones systems and water using the expanded ensemble method. A Monte Carlo and molecular dynamics simulation study
By A. P. Lyubartsev, A. Laaksonen and P. N. Vorontsov-Velyaminov 455

Theory for hydrogen-bonding nematic liquid crystals
By R. P. Sear and G. Jackson 473

Molecular dynamics simulations of quadrupolar relaxation of ^{131}Xe in carbon tetrachloride, acetonitrile, and methanol
By M. Odelius and A. Laaksonen 487

Stimulated emission pumping spectroscopy of $^2\Sigma$ and $^2\Pi$ vibronic levels in $\tilde{X}(v_1v_20)$ $^2\Pi$ NCO
By Ming Wu and T. J. Sears 503

Distributed basis sets of s-type Gaussian functions in molecular electronic structure calculations
By D. Moncrieff and S. Wilson 523

CONTENTS OF VOLUME 82

Dielectric study of partially isotope-substituted solid and liquid hydrogen and methane
By R. Böhmer, U. Giebenhain and A. Loidl 531

Experimental circular dichroism and VUV spectra of substituted oxiranes and thiiranes
By A. Breest, P. Ochmann, F. Pulm, K. H. Gödderz, M. Carnell and J. Hormes .. 539

***Ab initio* study of NO_2. Part IV. Vibrational levels of the ground electronic state of NO_2 in both the diabatic and adiabatic representations of the potential**
By E. Leonardi, C. Petrongolo, V. Keshari, G. Hirsch and R. J. Buenker 553

Relative strengths of axial and equatorial bonds and site preferences for ligand substitution on σ-bonded Y-shaped EL_3 complexes
By Ming-Der Su 567

Dynamical analysis of linear polymers using mode-specific trajectories
By C. E. Wozny, B. G. Sumpter and D. W. Noid 597

The freezing transition of bidisperse hard spheres: a simple model
By J. Han and J. Herzfeld 617

NUMBER 4—JULY 1994

Classical centrifugal-sudden calculations of transport and relaxation cross-sections for $Ar–N_2$
By A. S. Dickinson and W.-K. Liu 629

Structure of solid formamide at 7 K
By B. H. Torrie, C. O'Donovan and B. M. Powell 643

An *ab initio* study of molecular hydrogen and its deuterated analogues partially oriented in nematic liquid crystals
By J. B. S. Barnhoorn and C. A. de Lange 651

***NPT* Monte Carlo calculation of isotherms for the Lennard-Jones fluid**
By V. P. Gregory and J. C. Schug 677

A new *ab initio* potential for the neon dimer and its application in molecular dynamics simulations of the condensed phase
By R. Eggenberger, S. Gerber, H. Huber and M. Welker 689

Cryptates as model brownons. II. Dynamic light scattering of aqueous cryptate solutions
By S. Rossy-Delluc, T. Cartailler, P. Tivant, P. Turq and N. Morel-Desrosiers .. 701

First and second energy derivative analyses for open-shell self-consistent field wavefunctions
By Y. Yamaguchi, H. F. Schaefer III and G. Frenking 713

Behaviour of wave packets in the interaction and the Schrödinger pictures for tunnelling through a one-dimensional Gaussian potential barrier
By K. Ohnami, K. Miyazaki and Y. Mikami 735

NMR studies of non-freezing water in randomly packed beds of porous particles
By B. P. Hills and G. Le Floc'h 751

Instability of the liquid state at high density: a detailed numerical analysis
By J. R. Henderson and Z. A. Sabeur 765

Corrected expression for the heat of transport
By A. R. Allnatt 781

Microscopic dynamics of *ortho*-terphenyl in its polycrystalline and glassy forms
By A. Criado, F. J. Bermejo, A. de Andres and J. L. Martinez 787

Spectroscopy of BaBr. Rotational analysis of the $A^2\Pi–X^2\Sigma^+$ and $B^2\Sigma^+–X^2\Sigma^+$ transitions of the $^{138}Ba^{81}Br$ isotopomer
By O. Launila and P. Royen 815

Quantum chemistry and density functional calculations of formyl chloride
By G. D. Bent, M. Rasamny and T. Hall 825

Research Notes

An *ab initio* calculation of the energetics for the FO + HCl → HOF + Cl reaction
By J. S. Francisco 831

Discriminatory dispersion interactions between chiral molecules
By J. K. Jenkins, A. Salam and T. Thirunamachandran 835

NUMBER 5—10 AUGUST 1994

A direct method for determination of chemical potential with molecular dynamics simulations. 1. Pure components
By R. L. Rowley, T. D. Shupe and M. W. Schuck 841

Dynamical behaviour of methane in a clathrasil (dodecasil 3C) studied by quasi-elastic neutron scattering
By A. Schröder-Heber, B. Asmussen, W. Press, H. Blank and H. Gies 857

Computer simulation of polarizable fluids: a consistent and fast way for dealing with polarizability and hyperpolarizability
By G. Ruocco and M. Sampoli 875

Neutron diffraction study of the Li–Cl distance in molten mixture systems (Li, K)Cl and (Li, Cs)Cl
By Y. Miyamoto, S. Okazaki, O. Odawara, I. Okada, M. Misawa and T. Fukunaga 887

Ideal chemical potential contribution in molecular dynamics simulations of the grand canonical ensemble
By S. Weerasinghe and B. M. Pettitt 897

Vicinal proton–proton coupling constants. IV. Effect of individual substituents with second row α-atoms
By J. San-Fabián, J. Guilleme, E. Díez, P. Lazzeretti, M. Malagoli, R. Zanasi, A. L. Esteban and F. Mora 913

The use of the energy sudden approximation in the *m*-scaling of rotational cross-sections
By L. Eno 929

Local structure and orientational correlations in fluids composed of linear triatomic molecules
By A. Yethiraj, R. Dickman, G. Szamel, E. Kierlik and M.-L. Rosinberg 937

Monte Carlo simulation of semiflexible hard triatomic fluids
By A. Yethiraj 957

Inhomogeneous correlation functions for a planar membrane model neuron
By W. J. Ellis 973

Faraday LMR spectroscopy of the MgO $A^1\Pi$–$X^1\Sigma^+$ (0–2) and $a^3\Pi_{0,1}$–$X^1\Sigma^+$ (0–1) bands
By P. Mürtz, S. Richter, C. Pfelzer, H. Thümmel and W. Urban 989

Simulation of surfactant solutions. I. Micelle formation in the bulk phase
By D. R. Rector, F. van Swol and J. R. Henderson 1009

Thermodynamic perturbation theory for association into doubly bonded dimers
By R. P. Sear and G. Jackson 1033

Molecular dynamics study of the mixing and demixing of a binary Lennard-Jones fluid
By W. Scott, F. Müller-Plathe and W. F. van Gunsteren 1049

The Marcelja–Luckhurst molecular field theory for uniaxial nematics composed of flexible molecules. A variational derivation
By G. R. Luckhurst 1063

Research Note

Diffusion in restricted volume
By A. Bródka 1075

NUMBER 6—20 AUGUST 1994

Molecular viewpoint on high-temperature superconductivity. Importance of orbital degeneracy
By M. Mestechkin, G. Whyman and G. Klimko 1079

Thermal diffusion factors for the Lennard-Jones/spline system
By J. M. Kincaid and B. Hafskjold 1099

Molecular backbending in AgH and its description in terms of *q*-algebras
By L. P. Marinova, P. P. Raychev and J. Maruani 1115

Overall rotation along a reaction path
By X. Chapuisat and A. Nauts 1131

CONTENTS OF VOLUME 82

Square-well diatomics. Exact low density results
By M. P. Taylor 1151

Magnetic field effects on the photochemical hydrogen abstraction of 2′,3′,4′,5′,6′-pentafluoroacetophenone in a Brij 35 micellar solution
By Masatoshi Igarashi, Yoshio Sakaguchi and Hisaharu Hayashi 1165

An X-ray diffraction study of liquid chlorine
By C. Andreani, D. Colognesi, A. Filabozzi and F. Menzinger 1181

NMR relaxation and molecular reorientation over unequal potential barriers
By L. Latanowicz and Z. Pajak 1187

Rotationally resolved spectroscopy of the $\tilde{C}$–$\tilde{X}$ band of $^{15}NH_3$ by infrared–ultraviolet double resonance
By A. H. Bahnmaier, T. Engst, H. Jones and S. D. Colson 1203

A periodic orbit approach to the spectroscopy and dynamics of SO_2:$\tilde{C}^1B_2 \rightarrow \tilde{X}^1A_1$
By R. Prosmiti, S. C. Farantos and H. S. Taylor 1213

Linear hard sphere models. Virial coefficients and equation of state
By C. Vega, S. Lago and B. Garzón 1233

Treatment of inelastic collisions of a particle with a quantum harmonic oscillator by density matrix evolution
By J. Mavri, M. Lensink and H. J. C. Berendsen 1249

Fourier transform high resolution study of the $3\nu_2$, $2\nu_2 + \nu_5$, $\nu_2 + 2\nu_5^0$ and $3\nu_5^{\pm 1}$ rovibrational bands of $CH_3{}^{79}Br$ from 3830 cm^{-1} to 4300 cm^{-1}
By N. Ben Sari-Zizi and C. Alamichel 1259

Research Note

On the symmetrization of rotational spectra for freely rotating linear molecules
By A. Borysow and M. Moraldi 1277

Erratum

Calculated dissociation energies of the alkali metal monoxides NaO and KO. Basis set superposition error and symmetry lowering
By E. P. F. Lee, T. G. Wright and J. M. Dyke 1281

Index of Authors (with the titles of papers) 1283
